

Environment:

Arctic Wolf Networks, Inc., a global leader in cybersecurity, is dedicated to its mission to “End Cyber Risk”. As the company works relentlessly toward this goal for our customers, we are equally committed to conducting business responsibly and in a manner that sustains protects, and ensures the safety of our environment and people as core guiding principles. Therefore, we operate our business in accordance with industry-accepted standards of environmental protection and applicable environmental laws and regulations. As we develop and expand our ESG framework and programs, we will focus our efforts to do our part in minimizing our overall environmental impact, educate and empower our employees to work toward reducing their own individual footprints, build green buildings, contract with green vendors, and establish sustainability targets that will keep us accountable to our goals and strive for continuous improvements.
